<b>April 20, 2016</b>	Meeting 10

*Additional meetings dates may be added, as needed.*

## ACRONYMS AND KEY TERMS

<b>10-year flood events</b>	The term 10-year flood is used to define a flood event that statistically has a 10% chance of occurring in any given year.
<b>1-year flood events</b>	The term 1-year flood is used to define a flood event that statistically has a 100% chance of occurring in any given year.
<b>5-year flood events</b>	The term 5-year flood is used to define a flood event that statistically has a 50% chance of occurring in any given year.
<b>Avulsion</b>	The rapid abandonment of a river channel and the formation of a new river channel.
<b>Continuing eligibility program</b>	The continuing eligibility program was created by the USACE. The program provides interim criteria for determining the eligibility for rehabilitation assistance while the USACE makes revisions to the PL 84-99 program.
<b>CTG</b>	Community Technical Group
<b>FCZD</b>	Flood Control Zone District
<b>FHMP</b>	Flood Hazard Management Plan
<b>Landward toe</b>	The edge of the levee where the base meets the land.
<b>Left bank/right bank</b>	When looking downstream, the left bank is to the observer's left.
<b>LWD</b>	Large woody debris
<b>Riprap</b>	Rocky material used to armor shorelines against scour and other erosion.
<b>Risk management</b>	The process of identifying potential risks in advance, analyzing them and taking precautionary steps to reduce the risk.
<b>Scour</b>	Removal of sediment from around structures (e.g., bridges) caused by swiftly moving water. Scour compromises the integrity of structures.
<b>Slumping</b>	When the riverbank slides toward the water.
<b>Structural toe</b>	The edge of the levee where the base meets the natural ground.
<b>SWIF</b>	System Wide Improvement Framework
<b>USACE</b>	US Army Corps of Engineers
<b>Waterward toe</b>	The edge of the levee where the base meets the river.
<b>Willow lifts</b>	Silt bench at the base of a levee planted with willow trees.
