Table of Contents

Volume I - Minimum Technical Requirements and Site Planning

Chapter 1 - Introduction	1-1
1.1 Objective	1-1
1.2 Organization of this Manual	1-2
1.3 How to Use this Volume	1-4
1.4 Site Design Techniques and Requirements	1-4
1.5 Maintenance of Stormwater Best Management Practices	1-5
1.6 Development of BMPs for Stormwater Management	1-6
1.7 Relationship of this Manual to Federal, State, and Local Regulatory Requirements	1-8
Chapter 2 - Minimum Requirements for New Development and Redevelopment	2-1
2.1 Overview	2-1
2.2 Exemptions	2-2
2.3 Applicability of the Minimum Requirements	2-2
2.4 Minimum Requirements	2-7
Chapter 3 - Drainage Control Plan and Abbreviated Plan Submittal Requirements	3-1
3.1 Projects and Activities Requiring Plan Submittal	3-1
3.2 Abbreviated Plan	3-4
3.3 Drainage Control Plan	3-10
Chapter 4 – BMP and Facility Selection Process for Permanent Stormwater Control Plans	4-1
4.1 Purpose	4-1
4.2 BMP and Facility Selection Process	4-1
Volume I References	Ref-1
Appendix I-A – Example Maintenance Checklists	A-1
Appendix I-B – Guidelines for Wetlands when Managing Stormwater	B-1
Glossary, Acronyms, and Notations	Glossary
Glossary	Glossary-1
Acronyms	Glossary-35
Notations	Glossary-37

Volume II - Construction Stormwater Pollution Prevention

Chapter 1 - Introduction to Construction Stormwater Pollution Prevention	1-1
1.1 Purpose of This Volume	1-1
1.2 Content and Organization of This Volume	1-1
1.3 Thirteen Elements of Construction Stormwater Pollution Prevention	1-2
1.4 Water Quality Standards	1-3
1.5 Other Applicable Regulations and Permits	1-4
Chapter 2 - Planning	2-1
2.1 General Guidelines	2-1
2.2 Construction SWPPP Requirements	2-3
2.3 Step-by-Step Procedure	2-8
Chapter 3 - Best Management Practices Standards and Specifications	3-1
3.1 Source Control BMPs	3-1
3.2 Runoff Conveyance and Treatment BMPs	3-65
3.3 Protection of LID Facilities During Construction	3-141
Appendix II-A – Recommended Standard Notes for Construction Stormwater Pollution Prevention Plans	A-1
Appendix II-B – Background Information on Chemical Treatment	B-1

Volume III - Hydrologic Analysis and Flow Control BMPs

Chapter 1 - Introduction	1-1
1.1 Purpose of This Volume	1-1
1.2 Content and Organization of This Volume	1-2
1.3 How to Use This Volume	1-3
Chapter 2 - Hydrologic Analysis and Design Standards	2-1
2.1 Minimum Computational Standards	2-2
2.2 Western Washington Hydrology Model	2-5
2.3 Closed Depression Analysis	2-9
2.4 Flow Control Criteria	2-10
2.5 Infiltration Facilities for Flow Control	2-10
2.6 Underground Injection Control	2-21
Chapter 3 - Flow Control Design	3-1
3.1 Soil Preservation and Amendment (Ecology BMP T5.13)	3-1
3.2 Dispersion Facilities	3-7
3.3 Tree Planting and Tree Retention (for Flow Control Credit, Ecology BMP T5.16)	3-13
3.4 Bioretention Cells, Swales, and Planter Boxes (Ecology BMPs T5.14 and T7.30)	3-20
3.5 Permeable Paving (Ecology BMP T5.15)	3-44
3.6 Infiltration Trenches (Ecology BMP T7.20)	3-62
3.7 Infiltration Basins (Ecology BMP T7.10)	3-65
3.8 Rain Gardens (Ecology BMP T5.14A)	3-67
3.9 Roof Downspout Controls	3-72
3.10 Vegetated Roofs (Ecology BMP T5.17)	3-86
3.11 Roof Rainwater Collection Systems (Ecology BMP T5.20)	3-90
3.12 Detention Facilities	3-93
Chapter 4 - Conveyance Systems and Hydraulic Structures	4-1
4.1 Overview	4-1
4.2 Design Event Storm Frequency	4-1
4.3 Determination of Design Flows	4-2
4.4 Backwater Analysis	4-2
4.5 Conveyance System Route Design	4-2
4.6 Easements, Access, and Dedicated Tracts	4-3
4.7 Pipe System Design Criteria	4-4
4.8 Outfalls	4-13
4.9 Flow Spreading Options	4-16
4.10 Culvert Criteria	4-21
4.11 Open Conveyances	4-23
4.12 Private Drainage Systems	4-24
Volume III References and Information Sources	Ref-1
Appendix III-A – Methods for Determining Design Infiltration Rates	A-1
Appendix III-B – Design Aids: Design Storm Precipitation Values, Isopluvial Maps, SCS Curve Numbers, Roughness Coefficients, and Soil Types	B-1
Appendix III-C – Nomographs for Various Culvert Sizing Needs	C-1
Appendix III-D – Onsite Stormwater Management BMP Infeasibility Criteria	D-1

Volume IV Source Control

Chapter 1 - Introduction to Volume IV	1-1
1.1 What is the Purpose of this Volume?	1-1
1.2 How Do I Know Whether Any of this Applies to Me?	1-1
1.3 What Type of Pollutants are We Targeting with This Volume?	1-2
1.4 What are Best Management Practices?	1-4
1.5 Explanation of Required BMPs	1-5
1.6 What if I am Already Implementing Best Management Practices?	1-6
1.7 How Do I Get Started?	1-7
1.8 Some Important Requirements to Note	1-7
Chapter 2 - Worksheet for Commercial and Industrial Activities	2-1
Chapter 3 - Best Management Practices for Single-Family Residences	3-1
Chapter 4 - Best Management Practices for Commercial and Industrial Activities	4-1
Section A1 Cleaning or Washing Activities	4-7
Section A2 Transfer of Liquid or Solid Materials	4-21
Section A3 Production and Application Activities	4-39
Section A4 Storage and Stockpiling Activities	4-67
Section A5 Construction and Demolition Activities	4-91
Section A6 Dust Control and Soil and Sediment Control	4-97
Section A7 Other Activities	4-103
Chapter 5 - Source Control Best Management Practices	5-1
5.1 Index of BMP Descriptions	5-1
5.2 Source Control BMPs	5-2
Chapter 6 - Regulations and Requirements	6-1
6.1 Pierce County Codes and Ordinances	6-1
6.2 State, Federal, and Other Regulations and Requirements	6-3
Chapter 7 - Quick Reference Phone Numbers and Web Sites	7-1
Volume IV References	Ref-1
Appendix IV-A – Recycling/Disposal of Vehicle Fluids/Other Wastes*	A-1
Appendix IV-B – Example of an Integrated Pest Management Program	B-1
Appendix IV-C – Recommendations for Management of Street Wastes	C-1

Volume V Runoff Treatment BMPs

Chapter 1 - Introduction	1-1
1.1 Purpose of This Volume	1-1
1.2 Content and Organization of This Volume	1-1
1.3 How to Use This Volume	1-1
1.4 Runoff Treatment Facilities	1-2
Chapter 2 - Treatment Facility Selection Process	2-1
2.1 Step-by-Step Selection Process for Treatment Facilities	2-1
2.2 Other Treatment Facility Selection Factors	2-9
Chapter 3 - Treatment Facility Menus	3-1
3.1 Guide to Applying Menus	3-1
3.2 Oil Control Menu	3-2
3.3 Phosphorus Treatment Menu	3-3
3.4 Enhanced Treatment Menu	3-5
3.5 Basic Treatment Menu	3-6
Chapter 4 - General Requirements for Stormwater Treatment Facilities	4-1
4.1 Design Volume and Flow	4-1
4.2 Sequence of Facilities	4-3
4.3 Facility Liners	4-4
Chapter 5 - Pretreatment	5-1
5.1 Purpose	5-1
5.2 Applications	5-1
5.3 Best Management Practices for Pretreatment	5-1
Chapter 6 - Infiltration and Bioretention Treatment Facilities	6-1
6.1 Purpose	6-1
6.2 Applications and Limitations	6-1
6.3 Soil Requirements for Infiltration for Water Quality Treatment	6-2
6.4 Best Management Practices for Infiltration and Bioretention Treatment	6-3
Chapter 7 - Filtration Treatment Facilities	7-1
7.1 Purpose	7-1
7.2 Description	7-1
7.3 Performance Objectives	7-11
7.4 Applications and Limitations	7-11
7.5 Site Suitability	7-12
7.6 Design Requirements	7-12
7.7 Construction Criteria	7-14
7.8 Best Management Practices for Sand Filtration	7-14
Chapter 8 - Biofiltration Treatment Facilities	8-1
8.1 Purpose	8-1
8.2 Applications	8-1
8.3 Site Suitability	8-1
8.4 Best Management Practices	8-2

Chapter 9 - Wet Pool Facilities	9-1
9.1 Purpose	9-1
9.2 Applications	9-1
9.3 Best Management Practices for Wet Pool Facilities	9-1
Chapter 10 - Oil and Water Separators	10-1
10.1 Purpose	10-1
10.2 Description	10-1
10.3 Performance Objectives	10-1
10.4 Site Suitability	10-1
10.5 Design Criteria – General Considerations	10-4
10.6 Oil and Water Separator BMPs	10-6
Chapter 11 - Emerging Technologies	11-1
11.1 Background	11-1
11.2 Evaluation of Emerging Technologies	11-1
11.3 Applicability and Restrictions	11-2
Volume V References	Ref-1
Appendix V-A – Geotextile Specifications	A-1

Volume VI Comprehensive Low Impact Development Site Designs

Chapter 1 - Introduction and Requirements	1-1
1.1 Volume Intent	1-1
1.2 Applicability and Administration	1-1
1.3 Performance Goal and Objectives	1-2
1.4 Conduct a Site Analysis Prior to Designing an LID Project	1-3
Chapter 2 - Low Impact Development Strategies and BMPs	2-1
2.1 Introduction	2-1
2.2 Maintenance Criteria	2-1
2.3 65/10 Dispersion (Ecology BMP T5.30)	2-1
2.4 Better Site Design (Ecology BMP T5.41)	2-9
2.5 Preserving Native Vegetation (Ecology BMP T5.40)	2-11
2.6 Restoring Site Vegetation	2-13
2.7 Minimize Impervious Areas	2-16
2.8 Soil Preservation and Amendment (Ecology BMP T5.13)	2-22
Chapter 3 - Easements, Maintenance, and Enforcement	3-1
3.1 Dedicated Tracts and Conservation Easements	3-1
3.2 Maintenance Requirements	3-1
3.3 Enforcement	3-1
Volume VI References	Ref-1

Attachments – Sections A through H

Section A - Quantity Design Details

Section B - Quality Design Details

Section C - Erosion and Sediment Control Plan Details

Section D - Soil Evaluation Report Forms

Section E - Standard Stormwater Notes

Section F - Stormwater Facility Informational Sign Specifications

Section G - Covenants, Right-of-Entry, Bond, and Assignment Forms

Section H - Change Order Review Form
