PUBLIC NOTICE

Proposal:

Construct a single-user dock that would be 150 feet long (consisting of two connected piers) consisting of two concrete piers (18 feet long by 12 feet wide) and two narrow piers (24 feet long by 12 feet wide). The total overwater area would consist of 180 square feet.

Although the dock was not to have any piling or support structure, there would be a wooden channel for support the dock. The project would consist of a concrete pier, a rock bulkhead, and a rock breakwater.
