

APPENDIX B

REGION 5 ALL HAZARD MITIGATION PLAN 2020-2025 EDITION MAPS, FIGURES AND TABLES

<i>Geological Hazards</i>	
<i>Map, Figure or Table Title</i>	<i>Page Number</i>
<i>AVALANCHE</i>	
<i>Figure 4.1-1 Slab Avalanche</i>	<i>Pg. 4-22</i>
Map 4.1-1 Areas Vulnerable to Avalanche	<i>Pg. 4-24</i>
Table 4.1-1 Pierce County Avalanches of Record	<i>Pg. 4-25</i>
<i>EARTHQUAKE</i>	
<i>Figure 4.2-1 What is an Earthquake?</i>	<i>Pg. 4-29</i>
Figure 4.2-2 Types of Earthquakes	<i>Pg. 4-30</i>
Map 4.2-1 Pierce County Earthquake Sources	<i>Pg. 4-31</i>
Map 4.2-2 Seattle and Tacoma Fault Segments	<i>Pg. 4-34</i>
Map 4.2-3 Magnitude 6.9 Scenario Earthquake – Tacoma Fault Zone	<i>Pg. 4-36</i>
Map 4.2-4 Magnitude 7.2 Scenario Earthquake – Seattle Fault Zone	<i>Pg. 4-37</i>
Map 4.2-5 Magnitude 9.3 Scenario Earthquake – Cascadia Megathrust	<i>Pg. 4-38</i>
Map 4.2-6 Pierce County Liquefaction Susceptibility	<i>Pg. 4-40</i>
Map 4.2-7 Major Pacific Northwest Earthquakes	<i>Pg. 4-41</i>
Table 4.2-1 Notable Earthquakes Felt in Pierce County	<i>Pg. 4-41</i>
Figure 4.2-3 Salmon Beach, Tacoma Washington – Following Feb. 2001 Earthquake	<i>Pg. 4-45</i>
Figure 4.2-4 Liquefaction, Niigata Japan 1964	<i>Pg. 4-48</i>
Figure 4.2-5 Lateral Spreading – March 2001	<i>Pg. 4-48</i>
Figure 4.2-6 Bridge Seismic Screening Tool (BSST) Projected Reopening Times of Highway Bridges in WA After the CSZ Scenario	<i>Pg. 4-52</i>
<i>LANDSLIDE</i>	
Figure 4.3-1 Northeast Tacoma – Landslide 01/2007	<i>Pg. 4-55</i>

<i>Geological Hazards</i>	
<i>Map, Figure or Table Title</i>	<i>Page Number</i>
Figure 4.3-2 Pierce County Landslide Deposits, Scarps and Flanks, and Susceptibility	<i>Pg. 4-57</i>
Table 4.3-1 Landslide Facts for Pierce County – Shallow Landslide Susceptibility	<i>Pg. 4-57</i>
Map 4.3-1 Pierce County Deep Landslide Hazard Area	<i>Pg. 4-58</i>
Map 4.3-2 Pierce County Shallow Landslide Hazard Area	<i>Pg. 4-59</i>
Map 4.3-3 Pierce County Slope Stability Areas	<i>Pg. 4-60</i>
Figure 4.3-3 Pierce County Comparison of Landslide Susceptible Areas	<i>Pg. 4-61</i>
Table 4.3-2 Notable Landslides in Pierce County	<i>Pg. 4-62</i>
Figure 4.3-4 Ski Park Road – Landslide 1/31/03	<i>Pg. 4-63</i>
Figure 4.3-5 SR 165 Bridge Along Carbon River – Landslide 2/1996	<i>Pg. 4-64</i>
Figure 4.3-6 Aldercrest Drive – Landslide 1-1999	<i>Pg. 4-65</i>
<i>TSUNAMI</i>	
Figure 4.4-1 Hawaii 1957 – Residents Explore Ocean Floor Before Tsunami	<i>Pg. 4-67</i>
Figure 4.4-2 Hawaii 1949 – Wave Overtakes a Seawall	<i>Pg. 4-68</i>
Figure 4.4-3 Tsunamis in Washington State	<i>Pg. 4-70</i>
Map 4.4-1 Seattle and Tacoma Faults	<i>Pg. 4-71</i>
Figure 4.4-4 Tsunami Inundation and Current Based on Earthquake Scenario	<i>Pg. 4-73</i>
Table 4.4-1 Notable Tsunamis in Pierce County	<i>Pg. 4-75</i>
Figure 4.4-5 Salmon Beach, Pierce County, 1949 – Tsunamigenic Subaerial Landslide	<i>Pg. 4-76</i>
Figure 4.4-6 Damage in Tacoma from the 1894 Tsunami	<i>Pg. 4-78</i>
<i>VOLCANIC</i>	
Figure 4.5-1 Volcanic Hazards	<i>Pg. 4-83</i>
Table 4.5-1 Tephra Types and Sizes	<i>Pg. 4-85</i>
Map 4.5-1 Lahars, Lava Flows, and Pyroclastic Hazards of Mt. Rainier	<i>Pg. 4-87</i>
Table 4.5-2 Estimated Lahar Travel Times for Lahars 10(7) to 10(8) Cubic	<i>Pg. 4-89</i>
Map 4.5-2 Probability of Measurable Ashfall in Tacoma from Rainier	<i>Pg. 4-90</i>
Map 4.5-3 Mt. Rainier Identified Tephra, last 10,000 years	<i>Pg. 4-91</i>
Table 4.5-4 Pierce County River Valley Debris Flow History	<i>Pg. 4-92</i>

<i>Meteorological Hazards</i>	
<i>Map, Figure or Table Title</i>	<i>Page Number</i>
<i>CLIMATE CHANGE</i>	
Figure 4.6-1 IPCC Models on Global Temperature Change: 1900 to 2100	<i>Pg. 4-106</i>
Table 4.6-1 Recent and Projected Temperatures for the Pacific Northwest	<i>Pg. 4-108</i>
Figure 4.6-2 Puget Sound Projected Warming	<i>Pg. 4-109</i>
Figure 4.6-3 Puget Sound Projected Precipitation Change	<i>Pg. 4-110</i>
Figure 4.6-4 Puyallup River: Projected Change in Monthly Hydrograph	<i>Pg. 4-111</i>
Figure 4.6-5 Projected Decline in Snowpack	<i>Pg. 4-112</i>
Table 4.6-2 Projected Sea Level Risk: Tacoma	<i>Pg. 4-113</i>
Figure 4.6-6 Sea Level Risk Inundation Area in 2100 Tacoma Tideflats	<i>Pg. 4-113</i>
Figure 4.6-7 Climate Impacts and Natural Hazards	<i>Pg. 4-116</i>
Figure 4.6-8 Comparison of the South Cascade Glacier: 1928 to 2003	<i>Pg. 4-120</i>
Figure 4.6-9 Lower Nisqually Glacier Retreat: 1912 to 2001	<i>Pg. 4-121</i>
<i>DROUGHT</i>	
Figure 4.7-1 Sequence of Drought Impacts	<i>Pg. 4-124</i>
Table 4.7-1 Palmer Drought Severity Index	<i>Pg. 4-125</i>
Map 4.7-1 Pierce County Watersheds	<i>Pg. 4-126</i>
Figure 4.7-2 % Area Basin in Drought Conditions Since 1895	<i>Pg. 4-127</i>
Map 4.7-2 % of Time in Severe to Extreme Drought: 1895-1995	<i>Pg. 4-128</i>
Map 4.7-3 % of Time in Severe to Extreme Drought: 1985-1995	<i>Pg. 4-128</i>
Table 4.7-3 Notable Droughts Affecting Pierce County	<i>Pg. 4-129</i>
Figure 4.7-3 National Drought Mitigation Center Drought Impact Reporter	<i>Pg. 4-131</i>
Map 4.7-4 Columbia River Basin	<i>Pg. 4-132</i>
Map 4.7-5 USDA Climate Zones – Washington State	<i>Pg. 4-136</i>
<i>FLOOD</i>	
Map 4.8-1 Lower Puyallup River	<i>Pg. 4-143</i>
Table 4.8-1 Historical Flooding in Lower Puyallup River	<i>Pg. 4-144</i>
Table 4.8-2 Levees and Revetments in the Lower Puyallup River	<i>Pg. 4-146</i>
Table 4.8-3 Summary of Damages to Lower Puyallup River Facilities (1996-2017)	<i>Pg. 4-147</i>

<i>Meteorological Hazards</i>	
<i>Map, Figure or Table Title</i>	<i>Page Number</i>
Map 4.8-2 Middle Puyallup River	<i>Pg. 4-149</i>
Table 4.8-4 Historical Flooding in Middle Puyallup River	<i>Pg. 4-150</i>
Table 4.8-5 Levees and Revetments in the Middle Puyallup River	<i>Pg. 4-152</i>
