Highlights of the Adaptive System

The following system successfully adapts to both regional and community-scale needs:

- An integrated, looped regional trail system that links most major parks.
- Two existing and one new regional park to anchor the park system.
- County parks providing a variety of recreation experiences throughout the county.
- Diverse resource conservancy parks to conserve open space county-wide.
- Property acquisition for local parks in more densely-populated unincorporated areas.
- Strategic development of water access sites through partnership and ownership.
