Help

If help – for any reason – is needed following a disaster:

1. Try to remain calm. Remember, your neighborhood is prepared.
2. Secure this card in a front window or to a front door to alert your neighbors.
3. If you have a natural gas leak that you are unable to stop, open all your doors and windows and immediately get everyone out of the house.
4. If someone has sustained an injury, do what you can to restore breathing, stop bleeding, treat for shock, and provide general comfort. Do not move them unless necessary.
5. As you are able, check the status of all utilities and appliances.
6. Listen to your radio for details about the emergency.
