

# Re-Inspection Fees

## Bulletin 2

*Division of Building Safety and Inspection for 2018 International Codes*

A re-inspection fee is charged when an inspection on an issued permit is called for, and the work is not ready for the inspection or corrections from a previous inspection are not completed.

### **How much is it?**

The re-inspection fee is \$110. This fee is added to cover the cost of the additional inspections needed to complete that phase of your construction.

### **Will this affect other inspections?**

- Yes. Once a re-inspection fee has been added to your permit, it temporarily suspends your permit. You will not be able to request further inspections until the fee is paid.
- Once the fee has been paid, your permit will automatically be reactivated, and you can continue to call for inspections.

### **Where can I pay this fee?**

- You may pay your fees through your PALS account here:  
<https://pals.piercecountywa.gov/palsonline/#/dashboard>
- Please sign into your account through our PALS Permitting Portal.
- Click on the appropriate permit number on your parcel.
- Click the "I want to..." drop down menu and select "Pay fees".

### **Questions about inspection?**

Please contact your building inspector directly with questions you have about previous or future inspections.
