* eLOMA Certified—Allows Licensed Professionals to submit, electronically, a simplified Letter of Map Amendment (LOMA) request to FEMA. LOMAs are usually issued because a property has been inadvertently mapped as being in a floodplain, but is actually on natural high ground above the base flood elevation. eLOMA submittals can shorten the standard 60-day FEMA review process.

This is not a list of recommended consultants. It is also not a comprehensive list of all companies that work with Pierce County. Prior to choosing a consultant, it is wise to obtain at least three proposals from design professionals. When requesting service from a design or licensed professional, we recommend you verify they are familiar with Pierce County codes, regulations and permitting requirements.

Consultants: If you would like to be added to this list, please contact the “Engineer of the Day” at (253) 798-7037.
